LOGOS
Research Technologies

Additive Manufacturing Training & Prototyping Services

Industry-aligned 3D printing training, STEM innovation programs, and research prototyping support for schools, engineering colleges, universities, research labs, and product devetopment teams.

LOGOS
Research Technologies

College & Faculty Development Programs

- **Additive Manufacturing** Fundamentals
- **FDM Design**-to-Print Workflow
- **Material** Selection Techniques
- **Printer** Calibration and Troubleshooting
- **Process Optimization** Methods
- Industrial Case Studies
- Research Specimen Preparation

Student Skill Certification Programs

(with certificate verification Portal)

From Design to Print

- **3D CAD Model** Preperation
- **STL** File Preperation
- **Design for Additive** Manufacturing (DfAM)
- **Slicing** Software
- Hands on 3D printing section with our own 3D Printer
- 3D Printer Operation & Maintenance
- **Prototype** Development Workflow
- Industrial Application Exposure
- Material Selection Techniques

VERIFY CERTIFICATE

Scan To Verify Certificate

LOGOS
Research Technologies

Rapid Prototyping & Functional Part Manufacturing

- **Concept Prototype** Development
- **Mechanical** Test Specimens
- **Customized 3D** printed Corporate Gifts
- **3D Printed Moon** Lamps/Night Lamps
- **Biomedical** Models
- **Functional Engineering** Components
- **Product Enclosure** Fabrication
- **Custom Research** Fixtures

LOGOS
Research Technologies

Why Choose LOGOS Research Technologies?

- **Industry-relevant** training modules
- **Hands-on Design-to**-Print workflow
- **School-to-research** level training ecosystem
- **Research** specimen fabrication support
- **Faculty Development** Programs
- **Custom** experimental setup development
- **Support** for innovation and startup prototyping
